

Your involvement is needed

in how we
design the
study

Genital Herpes clinical trial

Clinical Research is better with patients
input!

If you live in the UK, are between 18 and 64 years and have a diagnosis of a genital herpes infection, you may be able to help us!

If you are eligible, we would ask you to:

- Complete a questionnaire
- Tell us about your disease and how it affects your life
- Tell us if you are interested in a future herpes vaccine trial

Contact us to see if you may be able to help:
